MEMORANDUM FOR: General Graham

SUBJECT : CPAG Objectives

During the next twelve months, I expect to accomplish the following:

-- Create and maintain an efficient multi-agency, multi-discipline staff capable of tracking, coordinating, and evaluating community efforts in collection and processing intelligence in support of the KIC's and other requirements.

-- Work closely with the R&D Council and the appropriate committees of the USIB to improve and maintain community coordinating mechanisms with respect to the collection and processing of intelligence. In particular, we should complete the first editions of a number of collection strategy papers:

-- Initiate steps to support other DCI elements (NIO's in particular) with collection strategies and monitoring of community processing problems through the USIB Committee structure.
